QMIS ERP — Overall User Manual

User Guide for School Management, Staff, Parents and Students

Queen Mira International School

Enterprise Resource Planning (ERP)

Official client user guide

For school leadership, academic and administrative staff,

campus operations teams, parents and students

1. Purpose of This Manual

This manual explains how Queen Mira International School uses QMIS ERP for day-to-day school operations. It describes what each role does, how common school processes run from start to finish, and how departments hand work to one another.

The guide is written for non-technical readers: school management, teaching and office staff, finance and HR teams, campus operations staff, parents and students.

2. How to Use This Manual

- Start with the general sign-in instructions if you are new to the system.
- Use the overview of roles to find your portal.
- Open your portal chapter for step-by-step tasks.
- Use the end-to-end workflow chapters when a process involves more than one department.
- Follow the handover notes so you know who acts next.
- Use the final guidance section for safe daily use of accounts and school data.

Contents (major sections): 1 Purpose · 2 How to use · 3 Sign-in · 4 Role overview · 5 System administration · 6 Leadership and academics · 7 Admission and family portals · 8 Finance · 9 HR · 10 Transport · 11 Campus operations · 12 Governance and audit · 13 End-to-end workflows · 14 How departments connect · 15 General operating guidance.

3. General Sign-In and Account Use

3.1 Signing in

1. Open the school's QMIS ERP sign-in page using the address provided by the school.
2. Enter the email address assigned to your school account.
3. Enter your password.
4. Select Login.
5. If the system asks you to change your password on first use, choose a strong new password and confirm it before continuing.
6. After a successful sign-in, you are taken to the home area for your role.

3.2 Using your account safely

- Use only the account issued to you. Do not share passwords.
- Sign out when you leave a shared computer.
- Check the academic year, class, section, student name and amounts before saving.
- If an action is not available on your screen, contact the responsible department—do not borrow another person's login.
- Report incorrect student, fee or staff information to the department that owns that record.

4. Overview of User Roles

QMIS ERP organises school work into role-based portals. Each person sees menus and tasks that match their responsibility. The table below summarises the main roles used by the school.

Role	Primary school focus
Super Admin	School-wide system and user oversight
Admin	School configuration, admissions support, academic masters, office coordination
Director	Leadership oversight, key academic approvals, monitoring
Principal	Academic administration, placement, examinations coordination
Coordinator	Grade-band academic coordination, placement support, marks review
Teacher	Assigned classes, attendance, lesson plans, marks entry
PRM / Admission (Front Office)	Enquiries, admission, enrolment, gate passes, office records
Parent	Linked children's academics, fees, announcements, transport views
Student	Own timetable, attendance, learning items, published results
Account Head	Fee structures, collections, receipts, finance approvals
Finance Assistant	Routine fee review and permitted collections
HR	Employee records, onboarding, leave and staff administration
Transport Manager	Vehicles, routes, drivers, student transport assignments
Transport Driver	Assigned vehicle, duty and related operational updates
Gate / Security	Visitors, entry/exit and gate-pass handling
Gate Keeper Manager	Gate staffing and duty assignment oversight
Librarian	Catalogue, issue and return of books
Stores / Stationery	Stock receipts, issues and inventory monitoring
Canteen	Menu, orders and related canteen operations
IT Support	Support requests, progress and resolution records
Housekeeping	Schedules, duties and completion records
Joint Director	Cross-department oversight and assigned follow-up
Joint Director Audit	Audit assignments, findings and closure follow-up
Process Auditor	Process review, evidence and corrective actions
Quality Auditor	Quality checks, non-conformities and corrective actions

5. System Administration Portals

5.1 Super Admin

Portal Purpose

The Super Admin portal supports school-wide system administration and oversight. It is used for senior administrative control of users, important school-wide views and governance of access across the ERP.

Main Responsibilities

- Oversee system-level administration for the school.
- Manage authorised user and role administration within permitted boundaries.
- Review school-wide operational summaries and administrative modules assigned to this role.
- Support accountability for account activation and access-related administration.

Step-by-Step User Workflow

7. Sign in with your Super Admin account.
8. Open the Super Admin dashboard to review the school-wide summary.
9. Use User Creation (or equivalent user-administration menu) to create or review staff logins you are authorised to manage.
10. Open the relevant oversight modules (for example finance overview, approvals, activity or audit-related views) as required by school policy.
11. Confirm that account status and access changes are recorded before signing out.

Information the User Needs

- Full name, email and role of any staff account you are authorised to create or update.
- School policy on who may hold elevated access.
- Reason for activation, deactivation or password reset requests.

Approval and Handover

Super Admin actions that create or change staff access should follow school authorisation. Day-to-day academic and finance work continues in the specialist portals; Super Admin does not replace those departments' operational duties.

Expected Outcome

Authorised users can sign in with the correct role. Oversight screens show the expected school-wide information.

Common Mistakes to Avoid

- Creating an account with the wrong role.
- Granting access without school authorisation.
- Changing another department's operational records instead of asking the owning department.

5.2 Admin

Portal Purpose

The Admin portal supports school configuration and day-to-day administrative coordination. Admin typically manages academic masters (classes and sections), supports admissions work, and coordinates office modules used across the school.

Main Responsibilities

- Maintain academic-year arrangements for classes and sections.
- Support admission lists and related Front Office records as assigned.
- Administer authorised staff or user records within Admin's creatable set.
- Coordinate announcements, calendars, documents and office workflows available in the Admin menu.

Step-by-Step User Workflow

12. Sign in and open the Admin home area (commonly Admissions).
13. Open Class Details to review or maintain classes and sections for the correct academic year.
14. Open Admissions to review applications or continue enrolment tasks assigned to Admin.
15. Use User Database or related menus for authorised student/staff directory work.
16. Save changes and confirm the list or record shows the update after refresh.

Information the User Needs

- Current academic year.
- Class names, section names and capacity where required.
- Admission or student details provided by Front Office / PRM.

Approval and Handover

Admin prepares and maintains school configuration used by academics, PRM and other departments. Specialist approvals (examinations, finance, HR leave) remain with those roles.

Expected Outcome

Classes, sections and administrative records are available for teaching, placement and admission teams.

Common Mistakes to Avoid

- Editing the wrong academic year.
- Renaming or deactivating a class without checking dependent students.
- Entering admission data that belongs to PRM's enquiry follow-up process without coordination.

6. Leadership and Academic Portals

6.1 Director

Portal Purpose

The Director portal supports senior academic leadership: reviewing school activity, deciding key academic approvals (such as examination timetables and final marks publication) and monitoring assigned leadership tasks.

Main Responsibilities

- Review academic items awaiting Director decision.
- Approve or return examination timetable submissions according to school process.
- Provide final authorisation in the marks approval chain so results can be published.
- Monitor leadership tasks, broadcasts and related academic oversight menus.

Step-by-Step User Workflow

17. Sign in and open the Director home area.
18. Open Approvals or the examination / marks review screens assigned to Director.
19. Read the submission details (class, exam, marks batch, comments).
20. Approve, or return with clear remarks if correction is required.
21. Confirm the item leaves your pending list and that the next stakeholders can proceed.

Information the User Needs

- Exam or marks submission details
- School academic calendar constraints
- Any remarks from Principal or Coordinator

Approval and Handover

Director is typically the final decision-maker for examination timetable approval and for publishing marks after Coordinator and Principal review.

Expected Outcome

Approved examinations and published results become available to authorised academic users and, once published, to permitted parent and student views.

Common Mistakes to Avoid

- Approving an incomplete marks batch
- Confusing draft marks with published results
- Omitting remarks when returning work for correction

6.2 Principal

Portal Purpose

The Principal portal supports academic administration for the campus: student placement oversight, teacher allocation, examination preparation, timetable coordination and mid-level academic approvals.

Main Responsibilities

- Oversee section placement and promotions as authorised.
- Coordinate teacher allocations and academic timetables.
- Create or submit official examination schedules for Director approval.
- Review marks batches at the Principal stage of the approval chain.
- Manage academic tasks, activities and staff-facing academic menus.

Step-by-Step User Workflow

22. Sign in and open Principal academic menus (tasks, allocation, examinations, placements as applicable).

23. For placement: open the student allocation / placement area, select the enrolled student, choose section and confirm.
24. For examinations: prepare the examination timetable and submit it for Director approval.
25. For marks: open pending approval items, verify entries, then approve or return.
26. Confirm saved placement or approval status after refresh.

Information the User Needs

- Enrolled student list
- Section capacity
- Exam dates and subjects
- Marks batches awaiting review

Approval and Handover

Principal reviews work from Coordinators and Teachers and forwards examination and marks decisions toward Director where required.

Expected Outcome

Students are placed in sections; examination schedules move to Director; marks progress toward publication.

Common Mistakes to Avoid

- Placing a student in the wrong section
- Submitting an incomplete exam timetable
- Approving marks without checking subject totals

6.3 Coordinator

Portal Purpose

The Coordinator portal supports grade-band academic coordination: section assignment for enrolled students in scope, academic follow-up, and the first review step for many marks batches.

Main Responsibilities

- Assign enrolled students in your grade band to sections.
- Support promotion activities where authorised.
- Coordinate lesson-plan and academic activity follow-up in your scope.
- Enter or review marks and act as the first approver in the marks chain when required.
- Monitor attendance and examination follow-up for assigned grades.

Step-by-Step User Workflow

27. Sign in and open Section Assignment / Student Placement.
28. Review students awaiting section assignment in your scope.
29. Select a student, choose the section and save. Roll numbers are assigned by the school process.
30. Open marks or approval menus to review submitted batches.
31. Approve or return with remarks, then confirm the item status updates.

Information the User Needs

- Grade band and academic year
- Section capacity
- Subject marks sheets
- Teacher submissions

Approval and Handover

Coordinator hands placed students to teaching teams and forwards marks to Principal after review.

Expected Outcome

Students appear in the correct section for teachers; marks batches advance in the approval chain.

Common Mistakes to Avoid

- Assigning outside your grade band
- Leaving students unplaced after enrolment
- Approving marks for the wrong examination

6.4 Teacher

Portal Purpose

The Teacher portal is the classroom workspace: assigned classes and subjects, timetable, lesson plans, attendance, assessment entry and student academic follow-up.

Main Responsibilities

- View assigned classes, subjects and timetable.
- Prepare and submit lesson plans for review.
- Mark class attendance.
- Enter assessment marks for authorised examinations and submit for approval.
- Revise returned marks batches when requested.
- Communicate academic updates through the menus available to Teachers.

Step-by-Step User Workflow

32. Sign in and open the Teacher dashboard.
33. Select the class/subject for attendance or marks.
34. Enter attendance or marks carefully against the correct student list.
35. Save drafts where available, then submit for approval when complete.
36. Monitor notifications for returns or approvals and revise if required.

Information the User Needs

- Class and section
- Subject
- Examination name and maximum marks
- Student list for the session

Approval and Handover

Submitted lesson plans and marks move to Coordinator → Principal → Director as configured. Teachers do not publish results themselves.

Expected Outcome

Attendance and marks are stored for review; after full approval, published results can appear for students and parents.

Common Mistakes to Avoid

- Entering marks for the wrong exam or class
- Submitting incomplete sheets
- Editing after submission without following the revise process

7. Admission and Family Portals

7.1 PRM / Admission (Front Office)

Portal Purpose

PRM (Front Office) manages admission enquiries, applicant records, enrolment and related office services such as gate passes, transfers and re-enrolment coordination.

Main Responsibilities

- Register and follow up admission enquiries.
- Maintain admission lists and applicant information.
- Complete enrolment, including guardian details and parent/student account linkage where used.
- Hand enrolled students to academic placement.
- Manage gate-pass and Front Office movement records as assigned.

Step-by-Step User Workflow

37. Sign in to the Front Office / PRM portal.
38. Open Admission Enquiry to capture or update an enquiry.
39. Move the applicant to Admission List when ready and complete required fields.
40. Use Enrol to create the student record and link parent/student accounts when required by school policy.
41. Confirm the student appears as enrolled and inform academic staff for placement.
42. For gate passes, open the relevant Gate Pass menu, enter details, save and share with Security as needed.

Information the User Needs

- Applicant and guardian contact details
- Preferred class
- Identity and document details as per school policy
- Account emails for parent/student portals when linking logins

Approval and Handover

Enrolled students are handed to Principal/Coordinator for section placement. Gate passes may require further approval fields (for example hostel-related approvals) according to pass type.

Expected Outcome

Enquiry and admission records are complete; enrolled students are ready for placement; gate-pass records are available to Security.

Common Mistakes to Avoid

- Duplicate enquiries for the same child
- Enrolling without guardian contacts
- Handing over before enrolment is finished

7.2 Parent

Portal Purpose

The Parent portal gives guardians a secure view of linked children only: academics, attendance, timetable and published results, fees and receipts, announcements and transport information where provided.

Main Responsibilities

- Select the correct child when more than one child is linked.
- Review attendance, timetable and published examination results.
- Review fee status and complete permitted online payments where enabled.
- Read announcements and notifications.
- View transport information for the linked child where available.

Step-by-Step User Workflow

43. Sign in with the parent account issued after enrolment.
44. Change the temporary password if prompted.
45. Select the child on the child-selection screen if required.
46. Open Dashboard, Attendance, Exam Result, Fees or Transport menus as needed.
47. For fees, confirm the child and amount before paying.
48. Sign out when finished.

Information the User Needs

- Parent login email
- Child’s name and class
- Fee references for payments

Approval and Handover

Parents do not approve school academic records. Fee payments are confirmed through the school’s finance process.

Expected Outcome

Parents see only their linked children. Published results and fee receipts appear after school processes complete.

Common Mistakes to Avoid

- Selecting the wrong child
- Expecting unpublished draft marks to appear as results
- Sharing the parent login with others

7.3 Student

Portal Purpose

The Student portal shows each learner their own academic information: timetable, attendance, learning activities, examinations and published results, plus related personal academic history where available.

Main Responsibilities

- View personal timetable and attendance.
- Access learning activities and announcements meant for students.
- View examination schedules and published results for self only.
- Review fee or hostel-related personal information if exposed in the student menus.

Step-by-Step User Workflow

49. Sign in with the student account.
50. Complete any required first-time password change.
51. Open Class, Attendance, Examinations or Results menus.
52. Confirm that the information shown matches your class and subjects.

Information the User Needs

- Student login
- Current class and section

Approval and Handover

Students view published information; they do not approve marks or examinations.

Expected Outcome

The student sees only their own records. Published results appear after Director (final) academic approval.

Common Mistakes to Avoid

- Using another student's device session
- Mistaking homework notes for official published results

8. Finance Portals

Finance work is split between Account Head and Finance Assistant so that fee configuration and high-level approvals remain with the Account Head, while routine collection can be performed by the Assistant.

8.1 Account Head

Portal Purpose

The Account Head portal is the school's finance desk for fee structures, collections, receipts, reconciliation, financial reports and finance approvals.

Main Responsibilities

- Define and maintain fee structures and related finance configuration.
- Oversee collections and outstanding balances.
- Issue and review receipts and financial records.
- Approve finance requests that require Head authority.
- Reconcile books and review reports.

Step-by-Step User Workflow

53. Sign in to the Account Head portal.
54. Open Fees Management to review or update fee structures for the correct academic year.
55. Open Collections or Fee Collection to record authorised payments.
56. Open Approvals for claims or expense items awaiting Head decision.
57. Review Reports and accounting books, then confirm figures after saving.

Information the User Needs

- Academic year
- Fee heads and amounts
- Student identifiers
- Payment mode and reference

Approval and Handover

Account Head authorises structure changes and Head-level finance approvals. Routine collection may also be done by Finance Assistant.

Expected Outcome

Fee structures and receipts are stored in the campus finance records; approved items leave the pending approval list.

Common Mistakes to Avoid

- Changing fee structures mid-term without school authorisation
- Posting a payment to the wrong student
- Approving expenses without supporting details

8.2 Finance Assistant

Portal Purpose

The Finance Assistant portal supports operational fee work: reviewing ledgers, collecting permitted fees, issuing receipts and following up outstanding balances—without changing fee masters or giving Head approvals.

Main Responsibilities

- Review fee ledgers and outstanding balances.
- Collect permitted fees and generate receipts.
- Follow up routine collection activities.
- Hand restricted actions (fee structure changes, Head approvals, finance settings) to the Account Head.

Step-by-Step User Workflow

58. Sign in (you land in the shared finance workspace with Assistant permissions).
59. Open Fees Management or Collections to locate the student and outstanding instalments.
60. Record the permitted collection and confirm the receipt.
61. If a fee structure change or approval is required, notify the Account Head instead of attempting restricted screens.
62. Refresh the list to confirm the payment appears.

Information the User Needs

- Student name / admission details
- Amount due
- Payment mode

Approval and Handover

Finance Assistant does not approve Head-level finance items and does not change fee structures. Those remain with Account Head.

Expected Outcome

Permitted collections and receipts are recorded. Restricted finance menus remain with Account Head.

Common Mistakes to Avoid

- Attempting to edit fee structures
- Collecting against the wrong instalment
- Treating a payment as complete before the receipt is saved

9. Human Resources Portal

9.1 HR

Portal Purpose

The HR portal manages employee information, onboarding, leave administration and related staff records.

Main Responsibilities

- Maintain employee profiles and staff directories information.
- Support onboarding and offer-related staff processes.
- Administer leave requests and staff attendance information where available.
- Produce staff administration reports used by leadership.

Step-by-Step User Workflow

63. Sign in to HR.
64. Open Employees or Onboarding to create or update staff records.
65. For leave, open Leave Management to review requests and record decisions within HR authority.
66. Confirm the employee or leave status after saving.

Information the User Needs

- Employee personal and contact details
- Designation and joining information
- Leave dates and type

Approval and Handover

Department heads may decide leave at their level; HR coordinates staff-wide leave and employee master data.

Expected Outcome

Staff records and leave decisions are available to authorised users.

Common Mistakes to Avoid

- Creating duplicate employee records
- Approving leave without checking balances
- Assigning the wrong designation

10. Transport Portals

10.1 Transport Manager

Portal Purpose

The Transport Manager portal runs fleet operations: vehicles, drivers, routes, stops, student transport assignments and duty monitoring.

Main Responsibilities

- Maintain vehicle and driver operational records.
- Define routes and stops.
- Assign students to transport routes.
- Plan driver duties and monitor transport operations.

Step-by-Step User Workflow

67. Sign in to Transport Manager.
68. Update Vehicles, Drivers and Routes as needed.
69. Open Student Transport to assign or change a student's route.
70. Assign duties and review operational requests (fuel/maintenance) according to school process.
71. Confirm assignments after save.

Information the User Needs

- Vehicle registration
- Driver details
- Route stops
- Student transport requirements

Approval and Handover

Transport Manager owns operational assignments. Drivers receive duty details. Finance may review transport expenses through finance processes.

Expected Outcome

Students and drivers have clear route and duty assignments.

Common Mistakes to Avoid

- Assigning a student to the wrong route
- Leaving a vehicle without a driver duty
- Updating the wrong vehicle record

10.2 Transport Driver

Portal Purpose

The Driver portal shows the driver's assigned vehicle, route and duty information, and supports duty confirmation and reporting of vehicle or trip issues.

Main Responsibilities

- Review assigned vehicle and route.
- Confirm or follow daily duty instructions.
- Report vehicle health, fuel or maintenance concerns through the available request menus.

Step-by-Step User Workflow

72. Sign in to the Driver portal.
73. Open My Duty and Vehicle details.
74. Follow the assigned route and duty timing.
75. Submit fuel or maintenance requests if required by school process.

Information the User Needs

- Duty date
- Vehicle number
- Route name

Approval and Handover

Drivers report to Transport Manager. They do not reassign students or edit master routes.

Expected Outcome

Duty is visible and issues are logged for Transport Manager follow-up.

Common Mistakes to Avoid

- Starting duty on the wrong vehicle
- Submitting duplicate maintenance requests

Handover: Transport Manager creates routes, vehicles and student assignments; Drivers carry out the duty and report issues back to Transport Manager.

11. Campus Operations Portals

11.1 Gate / Security

Portal Purpose

Gate and Security staff manage visitor registration, entry and exit records and gate-pass handling.

Main Responsibilities

- Register visitors and capture entry details.
- Check and process gate passes issued by Front Office or other authorised teams.
- Maintain relevant movement records for the campus gate.

Step-by-Step User Workflow

76. Sign in to the Gate Keeper portal (or Gate Keeper Manager portal if you assign duties).
77. Open Visitors or Gate Pass menus.
78. Verify identity and pass details before allowing entry or exit.
79. Update status fields and save.

Information the User Needs

- Visitor name and purpose
- Host/staff contact
- Gate-pass reference

Approval and Handover

Gate Keeper Manager may assign duties. Front Office prepares many pass records that Security executes.

Expected Outcome

Visitor and pass movements are recorded for campus safety.

Common Mistakes to Avoid

- Allowing entry without a valid pass
- Closing a pass against the wrong visitor

11.2 Librarian

Portal Purpose

The Librarian portal manages the book catalogue and the issue/return cycle for learners and staff borrowers.

Main Responsibilities

- Register and catalogue books
- Issue books to borrowers
- Record returns
- Monitor borrowing records

Step-by-Step User Workflow

80. Sign in to Librarian.
81. Open Book Management to add or update catalogue entries.
82. Use Issue/Return flows to lend and receive books.
83. Confirm the borrower's record updates after each transaction.

Information the User Needs

- Book title and accession details
- Borrower identity
- Due dates as per library policy

Approval and Handover

Library operations are owned by the Librarian; academic staff may request titles through school channels.

Expected Outcome

Catalogue and borrower records stay current.

Common Mistakes to Avoid

- Issuing a book already on loan
- Returning against the wrong borrower

11.3 Stores / Stationery

Portal Purpose

Stores maintains item records, receives stock, issues materials and monitors inventory levels.

Main Responsibilities

- Maintain item masters
- Record stock receipts
- Issue stock against requests
- Report discrepancies

Step-by-Step User Workflow

84. Sign in to Stationery Store Manager.
85. Update inventory items.
86. Record receipts when stock arrives.
87. Issue stock against approved requests.
88. Review alerts for low stock or discrepancies.

Information the User Needs

- Item name and unit
- Quantity
- Requesting department

Approval and Handover

Store requests may require Principal or Store Manager action depending on the request type.

Expected Outcome

Stock balances reflect receipts and issues.

Common Mistakes to Avoid

- Issuing more than available stock
- Posting receipt to the wrong item

11.4 Canteen

Portal Purpose

The Canteen portal supports menu/item information, order creation and review of saved orders.

Main Responsibilities

- Maintain menu items where used
- Create and review customer orders
- Track order status
- Review related canteen reports

Step-by-Step User Workflow

89. Sign in to Canteen Manager.
90. Open Menu Management if items must be updated.
91. Open Orders → Add Order.
92. Enter customer, items, quantity, payment details and save.
93. Confirm the order appears in the Orders list after saving and after refresh.

Information the User Needs

- Customer type and identity
- Menu items and quantities
- Payment method

Approval and Handover

Canteen manages its operational orders. Finance processes remain separate unless school policy links them.

Expected Outcome

Each saved order remains visible in the Orders list for follow-up.

Common Mistakes to Avoid

- Saving without selecting menu items

- Wrong customer identity
- Assuming an order is saved before confirmation appears

11.5 IT Support

Portal Purpose

IT Support records and tracks technology issues, progress and resolutions, and may maintain asset information.

Main Responsibilities

- Log support requests
- Update progress
- Record resolution
- Maintain asset notes where available

Step-by-Step User Workflow

94. Sign in to IT Support Manager.
95. Open tickets or assets menus.
96. Create or update a request with clear problem details.
97. Update status until resolved and record the outcome.

Information the User Needs

- Reporter name
- Device or service affected
- Priority and description

Approval and Handover

IT owns technical resolution; requesting departments confirm when service is restored.

Expected Outcome

Tickets show a clear status history.

Common Mistakes to Avoid

- Closing tickets without confirmation
- Missing asset identifiers

11.6 Housekeeping

Portal Purpose

Housekeeping manages cleaning schedules, duty allotments and completion records for campus sanitation.

Main Responsibilities

- Maintain schedules
- Assign duties
- Record completion
- Escalate maintenance concerns

Step-by-Step User Workflow

98. Sign in to Housekeeping Manager.
99. Open schedules or duty allotments.
100. Assign tasks and update completion status.
101. Note concerns for supervisor follow-up.

Information the User Needs

- Area/location
- Shift timing
- Staff assigned

Approval and Handover

Housekeeping Supervisor/Manager reviews completion; facilities issues may be handed to the relevant department.

Expected Outcome

Schedules and completion records are available for inspection.

Common Mistakes to Avoid

- Marking incomplete work as done
- Assigning the wrong area

12. Governance and Audit Portals

12.1 Joint Director

Portal Purpose

Joint Director provides cross-department oversight, assigned task follow-up and progress review.

Main Responsibilities

- Review assigned oversight tasks
- Follow progress across departments
- Request reports and updates

Step-by-Step User Workflow

102. Sign in to Joint Director.
103. Open dashboard and assigned task or review menus.
104. Record follow-up actions and confirm status updates.

Information the User Needs

- Department updates
- Assigned task list

Approval and Handover

Joint Director oversees; operational approvals remain with department heads unless specifically assigned.

Expected Outcome

Follow-up items have clear owners and status.

Common Mistakes to Avoid

- Closing follow-up without evidence

12.2 Joint Director Audit

Portal Purpose

Joint Director Audit assigns audits, reviews findings and tracks corrective actions to closure.

Main Responsibilities

- Create audit assignments
- Review findings and evidence
- Track corrective actions
- Close audits when criteria are met

Step-by-Step User Workflow

105. Sign in to Joint Director Audit.
106. Assign an audit to Process/Quality auditors as required.
107. Review submitted findings and evidence.
108. Monitor corrective actions until closure.

Information the User Needs

- Audit scope
- Department under review
- Evidence documents

Approval and Handover

Auditors raise findings; Joint Director Audit oversees closure discipline.

Expected Outcome

Assignments, findings and closures are traceable.

Common Mistakes to Avoid

- Closing findings without verified corrective action

12.3 Process Auditor

Portal Purpose

Process Auditors examine whether school processes are followed, record findings and propose corrective actions.

Main Responsibilities

- Execute assigned process reviews
- Check evidence
- Register findings

- Follow compliance actions

Step-by-Step User Workflow

109. Sign in to Process Auditor.
110. Open assigned fieldwork or audit tasks.
111. Record evidence-based findings.
112. Update corrective-action progress.

Information the User Needs

- Assignment brief
- Process checklist
- Evidence

Approval and Handover

Findings feed Joint Director Audit review.

Expected Outcome

Process findings are documented for follow-up.

Common Mistakes to Avoid

- Recording opinions without evidence

12.4 Quality Auditor

Portal Purpose

Quality Auditors perform quality checks, record inspection results and non-conformities, and track corrective actions.

Main Responsibilities

- Conduct quality inspections
- Log non-conformities
- Track corrective actions
- Support quality review

Step-by-Step User Workflow

113. Sign in to Quality Auditor.
114. Open assigned quality checks.
115. Enter inspection results and non-conformities.
116. Update corrective actions until verified.

Information the User Needs

- Inspection checklist
- Area or sample under review

Approval and Handover

Quality findings are reviewed under the audit governance process.

Expected Outcome

Quality results and corrective actions are recorded.

Common Mistakes to Avoid

- Clearing a non-conformity without re-check

12.5 Note on Hostel-Related Activities

In the current role structure, hostel information for families is viewed through Parent and Student menus (for example hostel details or hostel-related payments where shown). Front Office maintains hostel gate-pass records that may include a warden-approval field for Security. There is no separate Hostel Warden login portal among the standard QMIS ERP roles described in this manual. Day-to-day hostel operational decisions continue under the school's administrative arrangements and the Front Office / Security records above.

13. End-to-End School Workflows

Workflow 1: Academic Year and School Setup

Who starts: Admin (with leadership direction).

Information needed: Academic year name and dates; planned classes, sections and capacities.

Sequence of actions

117. Confirm the academic year to be used.
118. Create or activate classes for that year.
119. Create sections under each class with capacity.
120. Share the structure with Principal, Coordinators and Teachers.

Review / approval: Leadership confirms the structure before enrolment peaks.

Next handover: PRM uses class names during admission; Coordinators/Principal use sections for placement.

What to check: Class Details lists the correct year, classes and sections.

Workflow 2: Admission to Student Enrolment

Who starts: PRM / Front Office (Admin may assist).

Information needed: Child and guardian details, preferred class, contacts, documents as per policy.

Sequence of actions

121. Register the enquiry and follow up.
122. Create the admission record.
123. Complete enrolment and guardian information.
124. Create parent/student portal accounts when required and guide first password change.
125. Hand the enrolled student to academic placement.

Review / approval: Office supervisor checks completeness before handover.

Next handover: Principal / Coordinator for section placement.

What to check: Student appears as enrolled; parent/student can sign in if accounts were created.

Workflow 3: Student Placement and Teacher Allocation

Who starts: Coordinator (grade band) or Principal.

Information needed: Enrolled student, target section, capacity, teacher subject allocations.

Sequence of actions

126. Open placement / section assignment.
127. Assign section (roll number assigned by process).
128. Principal maintains teacher allocations for classes/subjects.
129. Teachers see assigned classes in their portal.

Review / approval: Principal oversees allocations and placement exceptions.

Next handover: Teachers for attendance and teaching; Parents see updated class/section.

What to check: Student shows correct class–section; teacher lists include the class.

Workflow 4: Timetable and Lesson Planning

Who starts: Principal/Coordinator for timetable; Teacher for lesson plans.

Information needed: Periods, subjects, teachers; lesson objectives and dates.

Sequence of actions

130. Prepare class timetable and submit for Director approval where required.
131. Teachers prepare lesson plans and submit for academic review.
132. Coordinator → Principal → Director review lesson plans as configured.
133. Teachers follow the approved timetable.

Review / approval: Director for timetable; academic chain for lesson plans.

Next handover: Teaching staff deliver lessons; leadership monitors compliance.

What to check: Approved timetable is visible; lesson plans show approved status.

Workflow 5: Attendance

Who starts: Teacher (class attendance).

Information needed: Date, class/section, student list.

Sequence of actions

134. Open attendance for the class.
135. Mark present/absent (and related statuses).
136. Save the attendance session.
137. Authorised staff and parents/students view permitted attendance information.

Review / approval: Coordinators/Principal may monitor patterns.

Next handover: Families via Parent/Student portals where enabled.

What to check: Attendance for the date is stored and visible to authorised viewers.

Workflow 6: Examinations, Marks and Results

Who starts: Principal/Coordinator prepare exam timetable; Teachers enter marks.

Information needed: Exam name, subjects, dates, max marks, student list.

Sequence of actions

138. Create and submit the examination timetable for Director approval.
139. After approval, Teachers/Coordinators enter marks in batches.
140. Submit marks for approval.
141. Coordinator reviews, then Principal, then Director provides final approval (publication).
142. Parents and students view published results for the correct learner only.

Review / approval: Exam timetable: Director. Marks: Coordinator → Principal → Director.

Next handover: Parent and Student portals for published results; notifications may alert parents.

What to check: Only approved/published results appear for families; draft marks remain internal.

Workflow 7: Student Promotion and Academic History

Who starts: Coordinator / Principal under school promotion policy.

Information needed: Current class/section, promotion target, academic standing.

Sequence of actions

143. Review eligible students.
144. Run promotion / section movement as authorised.
145. Retain academic history so past results remain attributable to the student.

Review / approval: Principal confirms promotion decisions.

Next handover: Teachers of the new class; families see updated class information.

What to check: Student's new class/section is correct; historical results remain accessible.

Workflow 8: Student Fees and Payments

Who starts: Account Head configures fees; Finance Assistant or Account Head collects.

Information needed: Fee structure, student, instalments due, payment mode.

Sequence of actions

146. Account Head sets or updates fee structures.
147. Staff locate the student ledger and outstanding instalments.
148. Finance Assistant or Account Head records permitted collection and receipt.
149. Account Head handles structure changes and finance approvals.
150. Parents may pay online where enabled and view receipts.

Review / approval: Account Head for configuration and approvals; Assistant for routine collection only.

Next handover: Parents receive receipts; leadership may review collection reports.

What to check: Payment appears on the student ledger after save; receipt is available.

Workflow 9: Parent and Student Access

Who starts: PRM/Admin during enrolment when portal accounts are created.

Information needed: Unique emails for parent and student; temporary credentials delivered securely by the school.

Sequence of actions

151. Create linked accounts at enrolment.
152. User signs in and changes password if required.
153. Parent selects the linked child; student sees only self.
154. Users open only the menus allowed for their role.

Review / approval: Office confirms linkage is correct if a parent reports a missing child.

Next handover: Academic and finance data appear automatically once published or posted.

What to check: Parent cannot see unrelated children; student cannot see other learners' results.

Workflow 10: Transport Assignment and Daily Duty

Who starts: Transport Manager.

Information needed: Routes, vehicles, drivers, student addresses/stop preferences.

Sequence of actions

155. Maintain vehicles, drivers and routes.
156. Assign students to routes.
157. Assign driver duties.
158. Drivers execute duties and report issues.
159. Parents/students may view transport information where provided.

Review / approval: Transport Manager monitors exceptions.

Next handover: Drivers for execution; families for visibility.

What to check: Student–route and driver–vehicle assignments match the day's plan.

Workflow 11: Visitor and Gate Management

Who starts: Front Office and/or Gate / Security.

Information needed: Visitor identity, purpose, host, pass type.

Sequence of actions

160. Create visitor or gate-pass record.
161. Security verifies and records entry/exit.
162. Update pass status on exit or completion.

Review / approval: Security supervisor / Gate Keeper Manager as applicable.

Next handover: Front Office retains administrative pass history.

What to check: Every entry has a matching record and closed status when the visit ends.

Workflow 12: Library Management

Who starts: Librarian.

Information needed: Book details, borrower identity.

Sequence of actions

163. Catalogue books
164. Issue to borrower
165. Record return
166. Review overdue items as per policy

Review / approval: Librarian.

Next handover: Borrowers (students/staff) receive/return books.

What to check: Issue and return appear on the borrower's record.

Workflow 13: Stores and Inventory

Who starts: Stores / Stationery Manager (requests may start with teaching staff).

Information needed: Item, quantity, requesting department.

Sequence of actions

167. Receive approved request
168. Issue stock
169. Record receipts of new stock
170. Report discrepancies

Review / approval: Store Manager; some requests involve Principal.

Next handover: Requesting department receives materials.

What to check: Stock on hand matches receipts minus issues.

Workflow 14: Canteen Operations

Who starts: Canteen Manager.

Information needed: Customer, menu items, quantities, payment details.

Sequence of actions

171. Ensure menu items are available.
172. Create the order and save.
173. Confirm the order in the Orders list.
174. Update order status through preparation and completion as used by the school.

Review / approval: Canteen supervisor.

Next handover: Customer receives the order; reports summarise sales.

What to check: Saved order remains listed after refresh.

Workflow 15: HR and Staff Administration

Who starts: HR.

Information needed: Employee biodata, role/designation, leave details.

Sequence of actions

175. Create/update employee
176. Support onboarding
177. Process leave decisions with department heads
178. Maintain attendance-related HR records where used

Review / approval: HR and department leave approvers.

Next handover: Employees and managers see outcomes in their leave/HR views.

What to check: Employee profile and leave status are correct.

Workflow 16: IT Support and Housekeeping

Who starts: Requester (staff) or IT/Housekeeping operator.

Information needed: Location/device, description, priority.

Sequence of actions

179. Log the ticket or housekeeping task.
180. Assign where the portal supports assignment.
181. Update progress.
182. Resolve and record completion.
183. Requester confirms service restoration when applicable.

Review / approval: IT Support Manager / Housekeeping Manager.

Next handover: Original requester.

What to check: Status history shows open → in progress → closed.

Workflow 17: Process and Quality Audits

Who starts: Joint Director Audit (assignment); Process/Quality Auditors (fieldwork).

Information needed: Scope, checklist, evidence.

Sequence of actions

184. Assign the audit.
185. Auditors collect evidence and register findings.
186. Agree corrective actions.
187. Verify and close.

Review / approval: Joint Director Audit.

Next handover: Audited department implements corrections.

What to check: Every finding has evidence and a closure note.

14. How Departments Connect

School operations in QMIS ERP are connected. The following business flow summarises the main handovers:

- Admission (PRM/Admin) creates enrolled students and may link parent/student accounts.
- Academic placement (Coordinator/Principal) assigns class and section.
- Teacher allocation and timetable guide classroom teaching and attendance.
- Examinations and marks approvals lead to published results.
- Published academic information appears for the correct Parent and Student viewers.
- Finance maintains fee structures and collections for students/families.
- Transport assignments connect students with routes, vehicles and drivers.
- HR maintains staff information used across authorised staff processes.
- Campus operations (Gate, Library, Stores, Canteen, IT, Housekeeping) keep their service records and hand issues to the responsible person.
- Audit roles review assigned areas, record findings and track corrective action.

Simple operational flow:

Enquiry → Admission/Enrolment → Placement → Teaching & Attendance → Examinations → Marks Approval → Published Results → Parent/Student View

Alongside academics: Fees (Finance) · Transport · Gate/Library/Stores/Canteen/IT/HK · HR · Audit oversight

15. General Operating Instructions and Troubleshooting

15.1 Daily good practice

- Sign in with your own account and sign out when finished.
- Check academic year, class, section, student name and amounts before saving.
- After important saves, refresh or reopen the list to confirm the record.
- Use remarks when returning work for correction so the next person knows what to fix.
- Protect personal data of students, parents and staff.

15.2 If something seems unavailable

- Confirm you are signed in with the correct role.
- Ask the owning department—access is intentionally limited by responsibility.
- For password problems, contact the school administrator who manages accounts.
- For incorrect academic or fee data, contact the department that created the record.

15.3 Approvals

Many academic items move through a defined review chain. If your item is pending, wait for the next role or respond promptly when you receive a return remark. Do not create duplicate submissions unless the school process requires a new submission after denial.

16. Closing Note

This Overall User Manual describes how QMIS ERP supports Queen Mira International School's administrative, academic, finance, transport, campus operations and audit work. Follow your school's local policies for documents, fees, transport safety and child protection in addition to the steps in this guide.

For account access or process clarification, contact your school's ERP administrator or the department head responsible for the process.
