Queen Mira International School

Brief In-Depth Workflow

What each role does, the sequence, and who receives the result

23 October 2026 · Completion: 432 / 31 / 15 / 2 of 480

How it works

One shared login opens a role workspace. Saves and approvals update shared campus records. Menus are not the only control.

Ready: Super Admin, Admin, Director, Principal, Coordinator, Teacher, PRM, HR, Account Head, Finance Assistant.

Drivers: shared login only, screens exist, no ready account. **Missing roles:** Admission Officer (use PRM), Hostel Warden, Managing Director screen.

Super Admin

Creates Administrator logins (not another Super Admin), decides Admin leave, approves activities, closes final escalations, and reviews finance and transport without posting fees or editing the fleet. Activity Logs, Re-entry, and Module Health are demonstration boards.

Admin, Director, Principal, Coordinator, Teacher

Admin creates staff logins and decides transfer certificates after PRM forwards them. Director approves exam timetables and Director-level leave. Principal allocates teachers and students and decides teacher leave. Coordinator places students and supports exams and marks. Teacher saves attendance and marks; parents see published results. Biometric attendance is still a gap.

PRM, HR, Finance

PRM enrols a student and can create the parent login. HR hires, may issue a staff login, administers leave, and produces payroll artefacts. Account Head defines fees and approves finance requests. Finance Assistant collects and receipts only; structure changes and approvals are denied.

Families, library, transport

Parent selects a child and views academics, dues, and transport, and can file a certificate. Student views are personal. Librarian issues books once a login exists. Transport Manager builds routes and assignments. Driver marks boarding only after a Driver account is created, on the same login page.

Other desks

Gate, canteen, IT, stores, and housekeeping each have a workspace that needs an account. Joint Director and auditors run oversight and audit fieldwork. Super Admin audit pages are not the working audit file.

Cross-department sequence

Enquiry → enroll and parent login → class placement → attendance and marks → fee structure → collection and receipt → parent balance. Leave: department head, then HR (Admin leave starts at Super Admin; driver leave starts at Transport Manager). Certificate: parent → PRM → Admin.

Next

Prove one driver route. Do not promise WhatsApp or card payment before a configured test. Treat 432 completed modules as the live core, and the 31 partial plus 15 not-completed items as oversight demos and transport login gaps.
