Deep Role-by-Role Operational Workflow Guide

Steps · Modules · Approvals · Cross-department flows · Implementation status

23 October 2026 · No credentials · Application not modified

Contents

- 1 Executive summary
- 2 How to read + system flow
- 3 Super Admin (deep)
- 4–8 Admin, Director, Principal, Coordinator, Teacher
- 9–12 PRM, HR, Account Head, Finance Assistant
- 13–17 Parent, Student, Librarian, Transport Manager, Driver
- 18–20 Ops managers, JD/Auditors, missing personas
- 21 Cross-department workflows
- 22 Security
- 23 Gaps & priorities
- 24 Closing / verification

1. Executive summary

One shared login opens a role workspace. Departments connect through shared student, staff, fee, leave, and transport records.

Ready demo path: Super Admin, Admin, Director, Principal, Coordinator, Teacher, PRM, HR, Account Head, Finance Assistant.

Drivers: no separate login page; driver screens exist; ready driver account missing — Partial.

Caution: Super Admin Activity Logs / Re-entry / Module Health are Demo. Email/WhatsApp/gateway need configuration.

Missing roles: Admission Officer (use PRM), Hostel Warden portal, Managing Director UI.

2. Overall flow

```
Shared Login -> Role dashboard -> Department actions -> Shared campus records -> Next role / family / reports
Unauthorized module URL -> redirect home | Session end -> login | Saves checked by permissions (not menus alone)
```

3. Super Admin — deep guide

A. Purpose

Top campus executive for one school campus (not multi-tenant SaaS). Oversees Admin accounts, attendance/directories, finance/transport governance views, Admin leave, activity approvals, final escalations, tasks to Admin.

B. Login and menus

- Shared login → Super Admin Dashboard.
- Menus: Dashboard; Attendance; User Database; User Creation; Gate Pass; Transport Overview; Finance (7); Audit Reports; Star Ratings; Tasks; Leave Received; Approvals; Activities; Announcement (view); Communication; Calendar; Notifications; Escalations Received; Activity Logs; Re-entry; Module Health.

C. Key operational steps

Create Administrator

- User Creation → Add Admin → submit → live path creates login + temporary password → Admin signs in and changes password.
- Cannot create another Super Admin here. Staff roles are created under Admin RBAC / HR — not this screen.
- Status/module checkboxes on View are Partial vs server permission matrix; no Reset Password button on SA User Creation.
- Status: Create Fully (when users service on); deactivate/reset UI Partial.

Leave, activities, escalations, tasks

- Admin leave → Leave Received → Approve/Reject → HR remains on server chain → Admin notified.
- Activities (Cultural/Sports/Competitions) → Approve/Reject (prefer over generic Approvals for durability).
- Escalations Received = final sink (Resolve/Close); cannot escalate further.
- Tasks: assign only to Admin; track updates.

Oversight honesty

- Finance Overview KPIs can be live; finance subsections largely Demo/read-only oversight.
- Transport Overview / Audit Reports SA views: Demo/Partial — not operational CRUD desks.
- Activity Logs (incl. Failed Logins), Re-entry Approvals, Module Health: Demo — not SIEM/integrations monitor.
- Multi-campus CRUD: Missing. Announcement compose: Missing for SA. Integrations console: Missing.

Capability	Status
Shared login + dashboard shell	Fully implemented
Create Administrator	Fully (service on)
Multi-campus tenant console	Missing
Activity Logs / Re-entry / Module Health	Demo/mock only
Leave / activity approve / escalations	Fully / Partial
Finance posting from SA	Missing (oversight only)
Email/WhatsApp control room	Missing / config-dependent

```
[Login]->[SA Dashboard]-> User Creation(Admin) | Leave(Admin) | Activities | Escalations(final)
Tasks->Admin | Finance/Transport/Audit VIEW (mix live/demo) | Logs/Re-entry/Health = DEMO
```

4. Admin

Day-to-day school administration: admissions support, directories, documents, TC decide, RBAC staff logins, announcements, tasks/escalations with Super Admin.

Critical steps

- RBAC → create Teacher/PRM/HR/etc. logins (temporary password).
- TC Request Approval: after PRM forward, Admin Approves (TC number) or Rejects — despite Super Admin status wording.
- Compose announcements; assign tasks; escalate toward Super Admin when needed.
- Does not own fee masters or full payroll.

Status: Ready demo login. TC label mismatch is a clarity gap.

5. Director

Leadership above Principal: exam timetable approvals, lesson/mark approvals, Director-layer leave, activities/star ratings.

Critical steps

- Approve exam timetable → teaching/exam operations proceed.
- Leave received from Principal/PRM/GKM/unmapped → decide → HR step on server.
- Academic quality approvals may return work to teachers for correction.

Status: Ready demo login. Exam paths need term verification.

6. Principal

Academic operations: class/exam timetables, teacher and student allocation, teacher leave, announcements, tasks.

Critical steps

- Allocate teachers/students → rosters feed attendance.
- Maintain class timetable → family/teacher views.
- Teacher leave → Principal → HR.
- Own leave → Director → HR.

Status: Ready demo login. Allocations/timetables verify each term.

7. Coordinator

Bridge Principal and Teachers: place/promote, exams write support, attendance, lesson plans, marks.

Critical steps

- Place/promote students → teacher rosters update.
- Exam schedules and mark batches → higher approval/publish → parent results.
- Own leave → Principal → HR.

Status: Ready demo login. Publish chain not fully verified for all exam types.

8. Teacher

Classroom execution: attendance, lesson plans, mark entry, tasks, personal leave.

Critical steps

- Class Attendance → save → parent visibility.
- Mark Entry → submit → approval/publish → Exam Result for families.
- Leave → Principal → HR.
- Cannot enroll, change fees, or final-approve TC.

Status: Ready demo login.

9. PRM / Admissions

No separate Admission Officer. PRM runs enquiry → list → enroll; transfers; re-enrollment; TC forward; gate passes.

Critical steps

- Enroll creates Student + guardian; parent login when email provided; student login optional.
- Already enrolled blocked. Skip parent account possible if no email.
- Next: placement (Coordinator/Principal), fees (Account Head), optional transport.
- TC: PRM review/forward → Admin decide.
- Leave → Director → HR.

Status: Ready demo login. Core enroll Fully when admissions service on.

10. HR

Staff lifecycle: recruitment, onboarding, employees/docs, leave admin, training, performance, payroll artefacts, disciplinary, exit.

Critical steps

- Offer accept may issue staff login (password change on first login).
- Hand joiners to Principal for allocation.
- HR is Level-2 leave approver for most roles; HR leave → Director.
- Payslip/bank email live send Dependent on external configuration.

Status: Ready demo login.

11. Account Head

Finance head: fee categories/structures, collections oversight, books, wallets, transport finance read, finance approvals, budgets/reports.

Critical steps

- Define structure → installments for matching students (protects paid rows).
- Collect → receipt → books → parent balances.
- Approvals: waivers/claims/repairs/etc. Approve/Reject.
- WhatsApp/gateway real delivery Dependent on configuration.

Status: Ready demo login. Core finance Fully when finance API on.

12. Finance Assistant

Same finance screens visually; permissions allow read+collect only — no masters write, no finance approve.

Critical steps

- Collections → receipt → done.
- Structure changes / approval decisions denied by server even if UI visible.
- Escalate exceptions to Account Head.

Status: Ready demo login. Permission model Fully implemented.

13-14. Parent and Student

Family portals on shared login. Parent selects child. View academics/fees/transport; file TC. Student views own data.

Critical steps

- Accounts normally from enrollment (parent common; student optional).
- Fees online pay Dependent on gateway config.
- Cannot edit school masters or mark attendance.

Status: Portal UI Fully; account readiness Partial until enroll.

15. Librarian

Catalogue, issue/return, members + shared staff tools.

Critical steps

- Add book → issue to member → return → family borrowed list may update.
- Needs Librarian account created (no seed).

Status: Partial — UI ready, seed login Missing.

16. Transport Manager

Fleet: drivers, vehicles, routes, student transport, duty, maintenance, expenses, driver leave decide.

Critical steps

- Build route → assign driver and students → assign duty.
- Driver leave → TM → HR.
- Finance can read transport masters for billing context.
- Needs TM account (no seed).

Status: UI Fully; seed login Missing; closed loop with driver Partial.

17. Transport Driver

Field ops role. Shared login only — no dedicated driver website. No ready demo driver account.

Critical steps

- Provision Driver-role user first or login fails.
- Menu: vehicle + attendance; also duty/route/fuel/maintenance/leave routes (menu incomplete).
- Mark boarding attendance; file fuel/maintenance/leave for TM.
- Live trip status in production: Unverified until field trial.

Status: Partial — screens yes; identity + dedicated page Missing.

```
TM: Vehicles/Routes/Assignments [screens]
Driver shared login [account Missing] -> Attendance/Duty/Requests [Partial]
TM monitors [screens] | Dedicated driver site: MISSING
```

18. Gate / Stores / Canteen / IT / Housekeeping

Each has a dedicated workspace on shared login (passes, duties, menu/inventory/orders, tickets/assets, stock issue, housekeeping schedules, etc.). Create accounts before go-live. Status: Partial.

19. Joint Director and Auditors

JD / Assistant oversee ops managers. JD Audit configures templates and assignments. Process/Quality Auditors execute audits, observations, CAPA, reports. Managing Director exists in permissions only — no FE portal. Status: Partial / MD UI Missing.

20. Missing personas

Persona	Reality
Admission Officer	Use PRM
Hostel Warden	Not a system role
Managing Director UI	Permissions only

21. Cross-department workflows

- Admissions→Enroll→Parent login→Place class→Fee structure→Collect→Parent view (core Fully/Partial; pay messaging Dependent).
- Teacher attendance/marks→publish→Parent/Student visibility (verify each exam type).
- HR hire→login→Principal allocate→Leave chain→Payroll artefacts (payout email Dependent).
- Transport setup→Driver account needed→Attendance→TM monitor (Partial).
- Leave maps: Teacher→Principal→HR; Driver→TM→HR; Admin→SA→HR; HR→Director.
- TC: file→PRM→Admin decide (wording may say Super Admin).
- Notifications: in-app Working/Partial; Email/WhatsApp Dependent.
- Payments: mock without keys; live Dependent on gateway + webhooks.
- User create→role→login→modules; SA Activity Log UI is Demo vs server audit events.

```
PRM Enroll -> Coord/Principal Place -> Teacher Attend/Marks
           -> Account Head Fees -> FA Collect -> Parent view
```

22. Access and security

- Menus are not full security; server permissions block illegal saves/approvals.
- Finance Assistant is narrower than Account Head despite similar screens.
- Single campus scope; multi-campus SA console Missing.
- First-login password change used for new accounts; forgot-password Unverified.
- Do not treat SA Activity Logs as live SIEM.

23. Priorities

Priority	Action
P0	Provision TM + Driver; field-trial route; confirm fee receipts; do not trust SA demo logs as SIEM
P1	Create other ops/auditor logins; fix TC wording in training; align driver menu; shared-login staff guide
P2	Hostel Warden / MD UI only if required; live charts replace illustrations

24. Closing / verification

Verified ready demo roles: Super Admin, Admin, Director, Principal, Coordinator, Teacher, PRM, HR, Account Head, Finance Assistant. Driver/TM and other ops roles: workspaces verified structurally; login readiness incomplete. This PDF is the shareable deep guide; the Word file contains the full chapter-length narrative for every role section (A–H).

Application was not modified during documentation.
