7. Transport Workflow (Manager and Drivers)
8. Workflow Gaps and Priorities
9. Closing Summary for Leadership

1. Executive Summary

QMIS ERP is a campus operations system with **one shared login page** for every role. After sign-in, the system opens the correct workspace—Finance, HR, Teaching, Front Office, Transport, Parent, Student, and others.

Departments share student, staff, fee, leave, and transport information. Admissions enrollment feeds academics and fees; teacher updates feed family views; finance collections update balances.

Key points for leadership

- No separate Admin-only or Driver-only login website — everyone uses the shared login.
- Core leadership, academics, PRM (admissions), HR, and Finance have ready demo accounts.
- **Transport Drivers:** driver workspace exists; no dedicated login page; no ready driver account yet — create a Driver-role user to use shared login.
- Hostel Warden is not a system role. “Admission Officer” work is done by PRM (Front Office).
- Email/WhatsApp and some charts need integration/live-data confirmation before strong go-live claims.

2. How Login and Access Work

- Open the school ERP login page → enter email and password.
- System opens the dashboard for that role (or asks for a first password change).
- User works only inside authorised modules for that role.
- Menus show allowed areas; important saves/approvals are also permission-checked by the system.
- Users operate within their campus records.

3. Role Directory and Access Summary

Role	Login	Landing	Main work	Status
Super Admin	Shared; demo ready	Super Admin dashboard	Campus oversight, users, audits	Ready
Admin	Shared; demo ready	Admissions/FO landing	Admin ops, TC, directories	Ready
Director	Shared; demo ready	Director area	Academic oversight & config	Ready
Principal	Shared; demo ready	Tasks / principal desk	Timetable, allocation, leave	Ready
Coordinator	Shared; demo ready	Coordinator dashboard	Placement, exams support	Ready
Teacher	Shared; demo ready	Teacher dashboard	Attendance, class, marks	Ready
PRM (Admissions FO)	Shared; demo ready	Admission enquiry	Enquiry → enroll; TC; gate	Ready
HR	Shared; demo ready	HR dashboard	Hire to exit, leave, payroll	Ready
Account Head	Shared; demo ready	Finance dashboard	Fee masters, approvals, books	Ready
Finance Assistant	Shared; demo ready	Finance (limited)	Collect fees & receipts	Ready
Parent	Shared; on enroll	Select child	Academics, fees, transport views	Partial
Student	Shared; on enroll	Class area	Own academics & payments	Partial
Librarian	Shared; create account	Book list	Catalogue & issue/return	Partial
Transport Manager	Shared; create account	TM dashboard	Fleet, routes, assignments	Partial
Transport Driver	Shared only; create account	Driver vehicle area	Duty/attendance/requests	Partial
Gate / Stores / Canteen / IT / HK	Shared; create accounts	Dept dashboards	Vertical campus ops	Partial
JD / Process / Quality Audit	Shared; create accounts	Audit dashboards	Findings & compliance	Partial
Admission Officer (name)	N/A — use PRM	—	Not a separate role	Missing
Hostel Warden	N/A	—	Not a system role	Missing

4. Complete Role Workflows

4.1 Admissions (PRM)

There is no separate Admission Officer role. PRM runs front-office admissions.

- PRM records enquiry and applicant details. (Working)
- PRM advances the application and enrolls the student. (Working)
- Student/parent logins can be created and may require first password change. (Working)
- Student data becomes available to academics, fees, and transport for authorised users. (Working)

4.2 Teacher

- Teacher signs in → teacher dashboard. (Working)
- Marks attendance and maintains class academic records. (Working)
- Enters/submits marks where enabled. (Working / verify per term)
- Parents/students see published information; leaders oversee. (Working)

4.3 Finance

- Account Head defines fee structures. (Working)
- Collector records payment and issues receipt. (Working)
- Balances update; families see payment status. (Working)
- Gateway/WhatsApp delivery depends on school configuration. (Partial)

4.4 HR

- HR manages recruitment and onboarding; may issue staff logins. (Working)
- Staff file leave; role-based approvers decide. (Working)
- Payroll and exit modules support HR operations. (Working in-app; bank/email integrations need confirmation)

4.5 Parent & Student

Both use the shared login. Accounts usually appear after enrollment. They view academics, fees, transport, and can raise requests such as TC. They cannot change school masters. Status: Partial until enrolled accounts exist.

4.6 Other campus roles

Librarian, Gate, Canteen, IT, Stationery, Housekeeping, Joint Director, and Auditor workspaces exist and use shared login. Ready demo accounts are generally not pre-loaded — create accounts before go-live. Status: Partial.

5. How Modules Connect

Connection	Who starts	What moves	Who uses next	Status
Admissions → Student/Parent	PRM enrolls	Student + login links	Teachers, Finance, Families	Working
Academics → Families	Teacher/Coord/Principal	Attendance, results	Parent/Student views	Working
Fees → Receipts → Families	Finance roles	Dues, receipts, balances	Parent/Student + reports	Working*
HR → Leave/Payroll	HR / staff	Employee & leave records	Approvers, payroll	Working*
Transport assignments	Transport Manager	Routes, drivers, students	Driver & family views	Partial
Notifications outbound	Many roles	Announcements/receipts	In-app + Email/WhatsApp	Partial
Permissions → modules	Login role	Allowed menus & actions	All departments	Working

* External bank/email/WhatsApp/gateway pieces need configuration checks before promising live delivery.

6. Workflow Diagrams

6.1 Overall system

```
Shared Login → Identify role → Role dashboard → Department actions
→ Shared campus records update → Other authorised roles continue / report
```

6.2 Module map

```
Admissions (PRM) → Student records → Academics | Finance | Transport
                        ↑                |         |
                      HR (staff/leave)  +----→ Parent/Student views
Notifications: in-app Working; Email/WhatsApp Partial if configured
```

In plain English: each department does its job; shared student and staff records carry the story forward.

7. Transport Workflow (Manager and Drivers)

Driver login answer: Drivers do **not** have a separate login website. They use the **same shared login**. A Driver workspace exists, but there is **no ready driver account** in the current demo set, so drivers cannot sign in until Admin/HR creates a Driver-role user.

Step	Status
Transport Manager manages vehicles & routes	Working screens (create TM account)
Assign drivers and students	Working screens
Driver dedicated login page	Missing
Driver shared login with provisioned account	Missing ready account
Driver views duty/route & marks attendance	Partial (screens exist)
Manager monitors operations	Working screens

```
Transport Manager → Vehicles/Routes/Assignments [screens Working]
        → Driver shared login [no separate page; account Missing]
        → Driver workspace attendance/duty/requests [Partial]
        → Manager monitors [Working screens]
```

8. Workflow Gaps and Priorities

P0 — Do first

- Create Transport Manager and Driver accounts; run one real route day.
- Confirm fee collection + receipts for Finance roles with live structures.
- Test Email/WhatsApp/payment gateway only after credentials are configured.

P1 — Next

- Create Librarian and other go-live department accounts.
- Issue a simple staff guide: shared login + which dashboard to expect.
- Explain Parent/Student first login after enrollment.
- Make driver duty/route/request screens easy to find in the menu.

P2 — Later

- Add Hostel Warden portal only if the school requires it.
- Keep “Admission Officer” as a training alias for PRM, or add a future alias role.
- Replace illustrative charts with live series; consider Managing Director UI if needed.

9. Closing Summary for Leadership

QMIS ERP runs as one connected school system. Users share a single login page and then work inside role-specific dashboards. Admissions (PRM) creates the student record that academics, finance, and transport use. Teachers run the academic day. Finance manages fees and receipts. HR runs the staff lifecycle. Families follow the child’s information in Parent and Student portals.

Ready today for guided use: Super Admin, Admin, Director, Principal, Coordinator, Teacher, PRM, HR, Account Head, and Finance Assistant. Transport driver capability is prepared in the product but still needs account provisioning and a supervised route trial. External messaging and gateway features need configuration checks. Hostel Warden and a separate Admission Officer role are not implemented as distinct system roles.

Bottom line: roles and modules are designed to hand work to each other through shared campus records; core admin–academic–finance–HR flows are ready; transport drivers share the common login and have screens ready, but driver access still needs accounts and practical verification.
